## DAG 1

### 8:15 - 9:00

Tiden er blevet brugt på at læse opgaven igennem og få skrevet nogle issues ind.

### 9:30 - 11:30

Partial Components, Layout og Router er lavet. Der mangler functionalitet i navigation.

### 11:30 - 12:30

ImageSlider er lavet. AuthProvider er gjort klar til LoginForm.

### 15:30 - 17:00

Nav kan registrere om du er logget ind. LoginForm lavet som Modal, Logout skal fixes i morgen.

### 11:45 - 14:45

Har brugt al tiden på at lave min LiftPage til Mobilefirst og så Desktop, nu mangler jeg kun Filter. Styling var rigtigt svær men i sidste ende er jeg tilfreds med resultatet.

### 16:00 - 17:15

Filter er blevet stilet, mangler funktionalitet.

### 22:00 - 23:00

Har prøvet men har ikke kunne få ListFilter til at virke. Har tænkt mig at lave LiftDetails i morgen og lad Filter ligge til Torsdag med mindre jeg kan overskue det i morgen.

Konklusion for anden dag er at det er gået godt. Jeg havde udfordringer med styling og med at forbinde LiftSearch med LiftList, men jeg fandt en løsning ved at bruge props sammen med search og setSearch. Det gjorde at værdierne fra søgefeltene kunne sendes videre til LiftList og bruges til at filtrere min LiftList resultater.
